I. Our Mission

The Georgie Badiel Foundation (GBF) is a charitable organization that aims to provide clean water and sanitation to the people of Burkina Faso by building and restoring wells, providing technical training in well operation and maintenance, and creating educational programs for sanitary and hygiene practices. We are developing sustainable solutions that will empower individuals for generations to come.

Over 54% of the rural population in Burkina Faso do not have access to clean drinking water. Fifteen million four hundred thousand people do not have access to a decent toilet, which is roughly four (4) in (5) people. Our mission is to change that.

II. Where Do We Work?

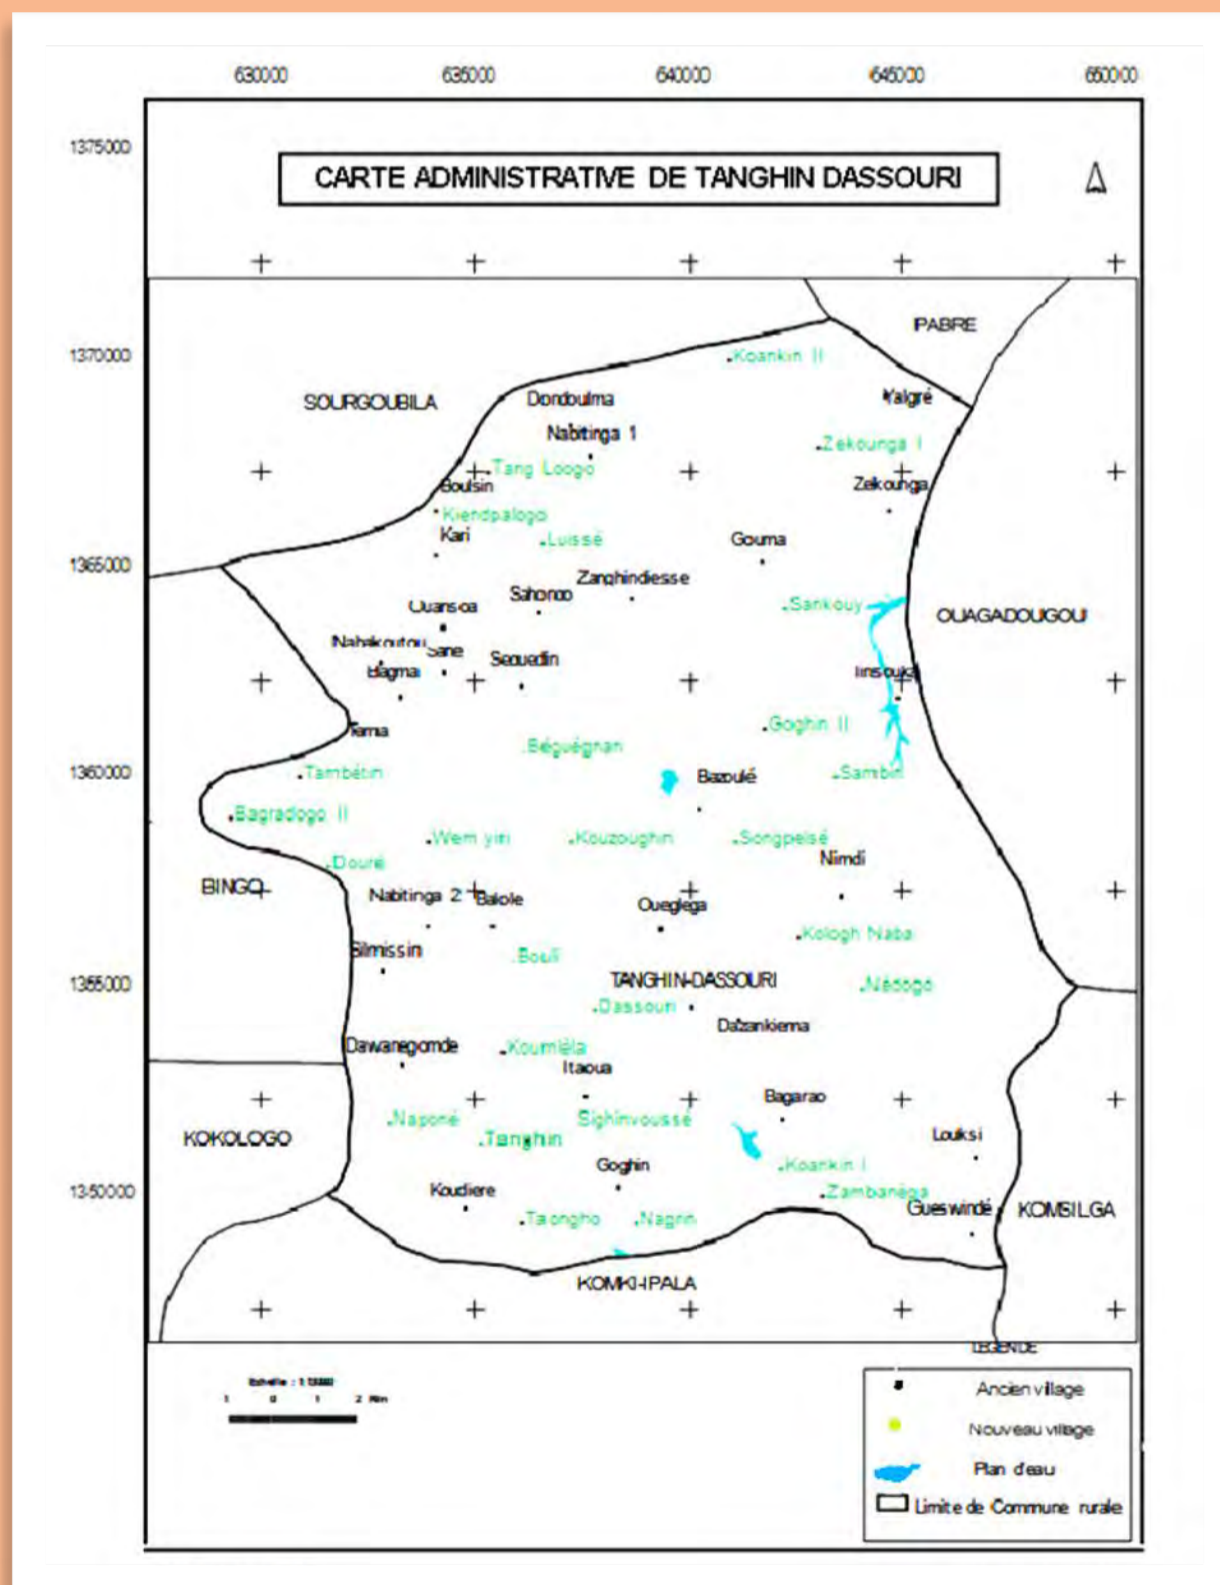

The Georgie Badiel Foundation works in Burkina Faso, which is a landlocked country in West Africa. It covers an area of around 274,200 square kilometers (105,791 sq. miles) and is surrounded by six other countries: Mali to the north, Niger to the east, Benin to the southeast, Togo to the southeast, Ghana to the south, and the Ivory Coast to the southwest. In 2020, the United Nations estimated the population to be 20.9 million people. The country's official language of government and business is French. However, roughly 50% of the population speaks the Mossi language natively. Formerly called the Republic of Upper Volta (1958–1984), the country was renamed "Burkina Faso" on August 4th, 1984, by President Thomas Sankara. Its citizens are known as Burkinabe. Its capital is Ouagadougou.

GBF works in the town of Tanghin-Dassouri and Komsilga. Both towns are in the Department of the Kadiogo Province in Burkina Faso.

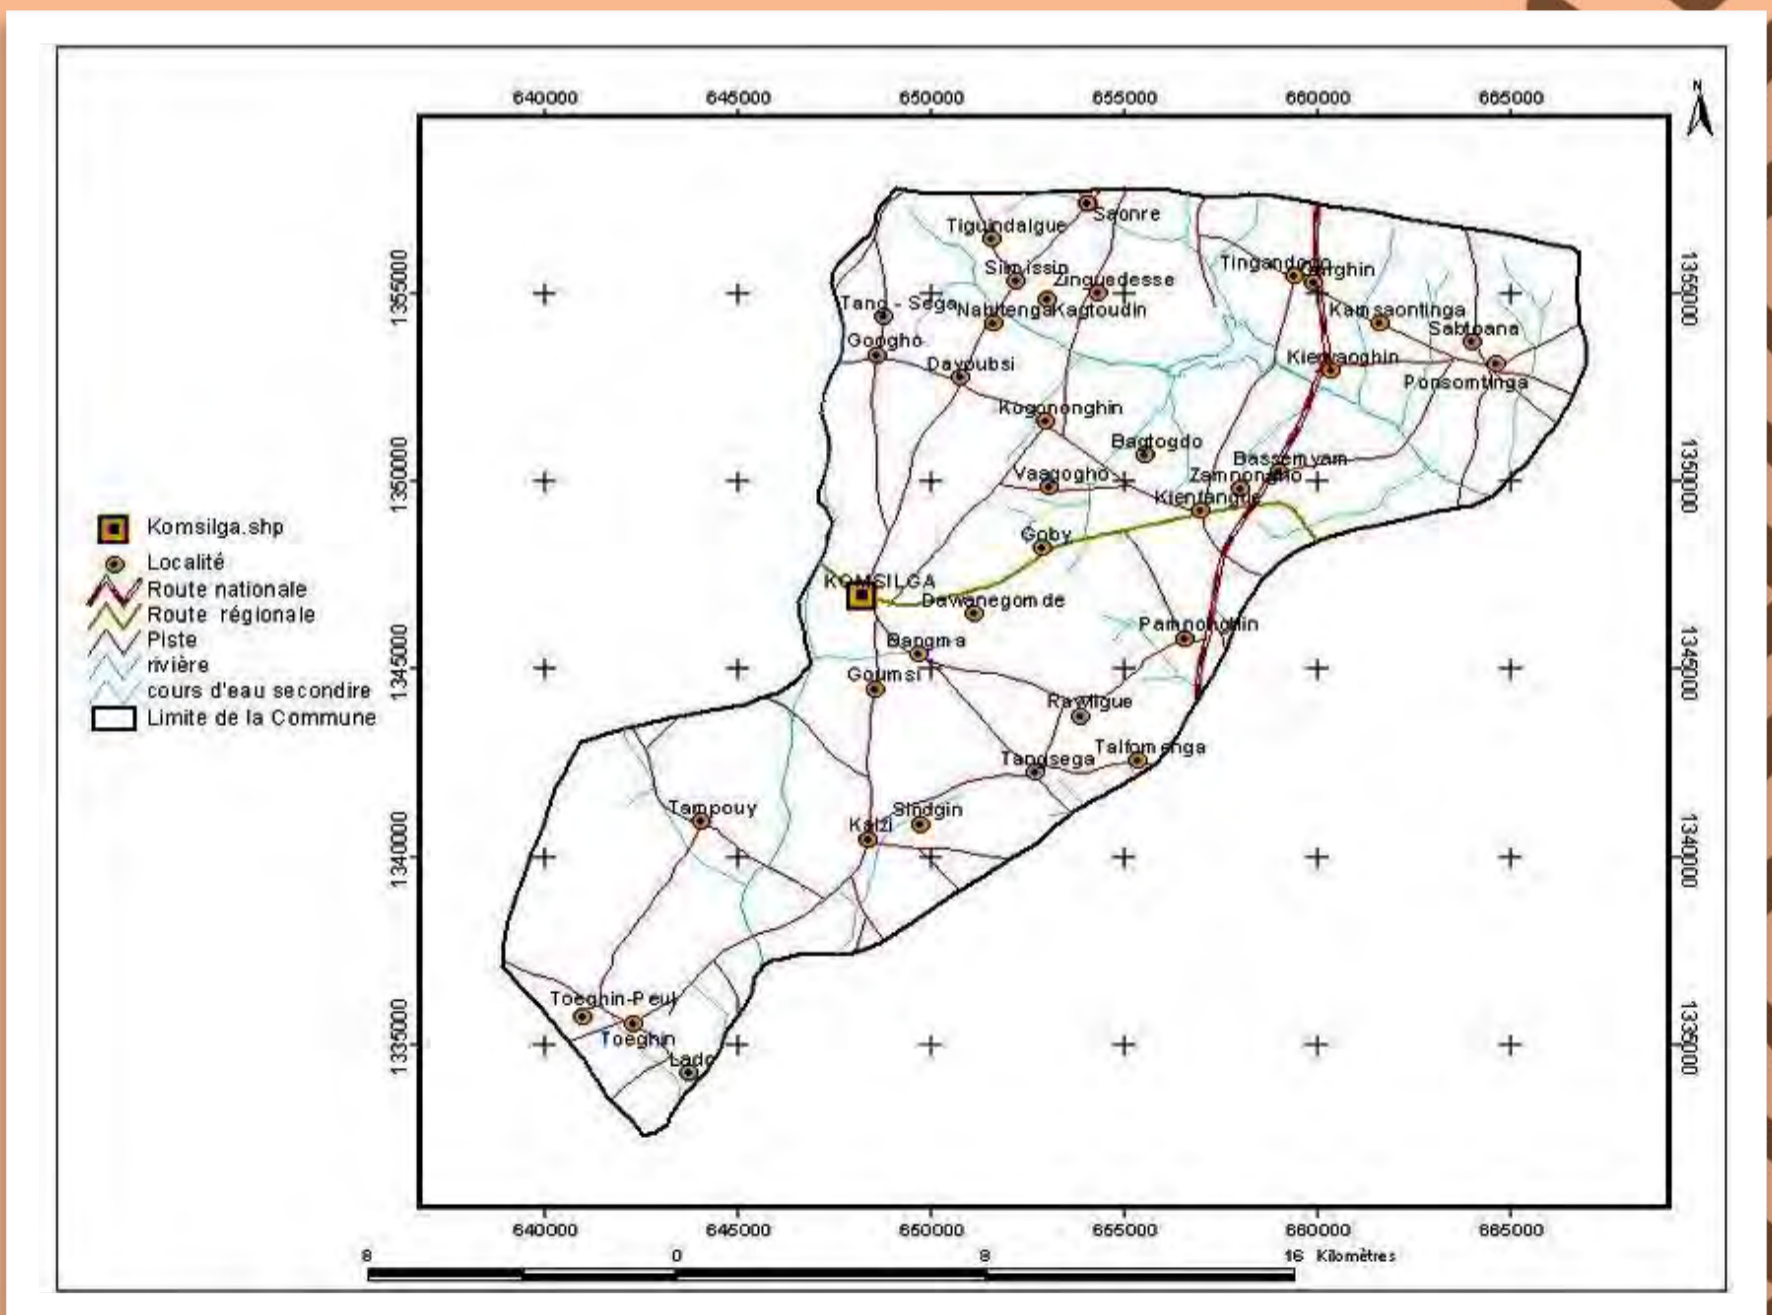

1. Tanghin-Dassouri

The rural commune of Tanghin-Dassouri is part of the Centre Region and the province of Kadiogo. It is located on the national road N°1, linking Ouagadougou to Bobo-Dioulasso, 25 km from Ouagadougou, the capital of Burkina Faso. It covers an area of 315.495 km² and has 59 villages. See the following map.

2. Komsilga

The rural commune of Komsilga has 36 villages (see administrative map). Komsilga, although partially developed, does not have a well-structured internal road network, nor does it have adequate infrastructure and equipment to become an urban center. The minimum distance between the main town and the various villages is less than 3 km and the maximum distance is 18 km. In addition, more than half of the villages are located less than 10 km away.

III. Our 2021 Impact

In order to reduce the suffering of the populations in terms of access to clean drinking water, which is an important factor of development, the foundation has realized two (02) new positive boreholes in the villages of Laado and Talfomenga offered by our partner TEEEM. It has also repaired twenty-eight (28) boreholes—twenty-eight (28) of which twenty-seven (27) are located in Tanghin-Dassouri and one is in Komsilga Center.

It has also repaired twenty-eight (28) boreholes—twenty-eight (28) of which twenty-seven (27) are located in Tanghin-Dassouri and one is in Komsilga Center.

During the repairs, the foundation has trained more than sixty (60) women, at a rate of two (02) women per village, in the care and maintenance of the wells. In addition, the young girls at the College General d'Education (CEG) of Komsilga were sensitized to the art of feminine hygiene and associated products were distributed for their intimate hygiene care, offered by our partner Honey Pot.

The Process of Drilling the Wells in the Villages of Talfomenga and Laado.

a. Site Work

On the whole, this work went well before the drilling. The geophysical research methodology adopted during the field prospection consisted of locating the fracturing levels by carrying out resistivity profiles in order to crosscheck possible electrical anomalies crossing the study area. At the end of the survey, two electrical boreholes and four resistivity profiles were found at each of these sites, marking two water points.

b. The Drilling

1. The Diameter of the Hole

The work was carried out in two stages:

- Rotary drilling from the alteration to the hard rock with the 9 7/8" diameter tricone with 25 m, 15 m at Talfomenga and Laado
- Down-the-hole hammer drilling with a 6 1/2" diameter hammer to the projected depth of drilling, i.e., the thickness of the bedrock.

In both cases, the cuttings were taken for each meter drilled as indicated in the contract.

2. Equipment and Blowing Out of the Hole.

Once the formation is completed, the borehole walls are stabilized by the solid casings until the end of the alteration and the casing screens beyond the alteration. The annular space between the borehole walls and the equipment is graveled to serve as a gravel pack. In addition, once the equipment was completed, a blowout was performed, which lasted one hour.

c. Development / Pumping

The first step is to blow the water for a number of hours to clean the mud contained in the borehole until clear water is obtained.

Then the team proceeded to the pumping test to measure the water flow and to the water sampling for the physicochemical analysis and the microbiological examination.

Fixing the Pump and the Super Structure

The installation consisted of a human-powered India Mark II pump with a stainless-steel pipe of 33 mm diameter at the level of each positive borehole, after having received the different water analysis sheets proving the potability of the water. This step marks the provision of the borehole to the beneficiaries and the end of the works

At the end of the drilling and development work, we obtained the so-called provisional results at each drilling site, which are recorded in the table below.

Village	Date of Work	Provisional Results		Final Result after Development	
Talfomenga	Janvier 2021	Debit	Alteration	1,5 m ³ /h et prof 60 m	
		0,7m ³ /h	25 m		
Laado	Janvier 2021	Debit	Alteration	Debit	Prof Total
		1 m ³ /h	15 m	2,5m ³ /h	50m

The water is now ready for use after receiving the various water analysis forms proving the potability of the water. This stage marks the provision of the borehole to the beneficiaries and the end of the works.

IV. Women Empowerment Program

1. Georgie Badiel Foundation Repaired the Boreholes in Two Stages:

- Diagnosis of the boreholes carried out by the four (04) women who are the focal points of the foundation under the assistance of the craftsmen repairers of the commune.
- The actual repairs which consist of removing the tubes to the cylinder and replace the various parts of the India pump.

2. The Training of Women

The training takes place in two stages:

- First, a theoretical training provided by Mr. Ouedraogo Zakaria, an engineer from the foundation. Second, practical training is provided by the repairers in each commune.
- Two (02) women are chosen per village to participate in the training in order to understand the mechanisms of their well. This practice will allow the women to maintain their well themselves.

3. Hygiene Campaign of Awareness with Honey Pot

Our foundation has distributed more than one hundred (100) products of the Honey Pot Company to the young girls of the general education college of Komsilga. These products will allow the girls to be present during their menstrual period and to be in good health thanks to its hygienic components. This awareness campaign is welcomed by the teaching staff of the commune as well as the students. In addition, Honey Pot restored the school's well, so young girls can be confident about proper hygiene while going to school.

V. Transparency

The Georgie Badiel Foundation is fully committed to be transparent on how the organization's funds are spent. Please check our last tax report on our website.

VI. Our New Well Drilling Machine

Last year, the Georgie Badiel Foundation was able to receive a loan from our new partner The Dunn Family Charitable Foundation, which enabled us to buy our first well drilling machine. This will help us to reduce the cost of drilling our wells. The Dunn Family Charitable Foundation also provided grants to us for more than \$90,000. We welcome them into GBF family and thank them for believing in our cause.

VII. Conclusion and Thank You!

The year 2021 was a very difficult year for Burkina Faso in terms of security. This scourge has had an impact on the activities of the Georgie Badiel Foundation despite the difficult security context, the foundation was able to meet the commitments to its beneficiaries and partners. We continued our mission in the province of Kadiogo, particularly in the communes of Komsilga and Tanghin-Dassouri, whose main objectives were to provide drinking water to the most destitute. Thanks to our partners and the determination, motivation, and commitment of each of our donors, the entire GBF team, and the board of directors, who have made it possible to achieve a satisfactory result. The foundation has allowed about fifty thousand (50,000) people to have access to drinking water during the year 2021, sensitized more than one thousand (1,000) students on the use of sanitary products, trained more than sixty (60) women in the maintenance and the repair of their water wells. This positive result is a relief for the foundation, which hopes for more support from its partners in order to meet other challenges in terms of access to drinking water in Burkina Faso.
